Priority		

Section	**Page**	**Figure Table**

Category Name Data Server (DSS) Design

Sub Category

Subject Location of product request handling (e.g. segmentation) in the system.

Actionee ECS

Description of Problem or Suggestion:

It appears that product request handling (segmentation) is happening too late in the process.
- information useful for sorting/segmenting the request has been lost.
- on demand requests are not able to reuse the same tools/functions to control processing.
- subsetting/subsampling is not handled by DDIST.

Originator's Recommendation

Move the product request handling function from the DDIST to the to the SDSVR.

Do not forget on demand.

GSFC Response by:

HAIS Response by: J. Smith

HAIS Schedule

HAIS R. E. J. Smith

HAIS Response Date 5/31/96

We agree in principle with this RID recommendation. Scenarios are being developed by both SDSRV and DDIST to explain the current process and what changes would be required to implement this recommendation. A preliminary presentation presented at the Mid-Cycle review and a final solution will be presented at the Delta Design Review.
